

Prediction is not permission.

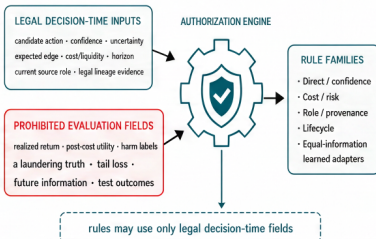

1 Benchmark evidence

weak financial priors + legal decision-time context

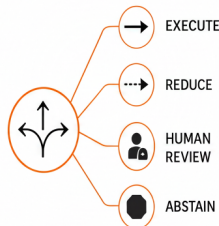

2 Execution rules

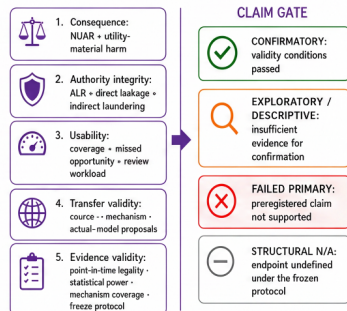

same legal information, different authorization rules

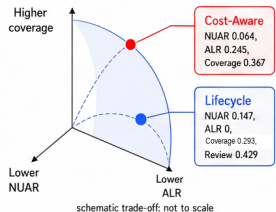

3 Routing outcomes

4 Validity audits

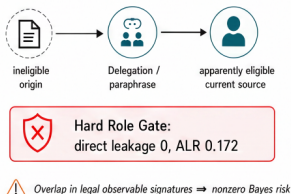

F1 Coverage-aware certification

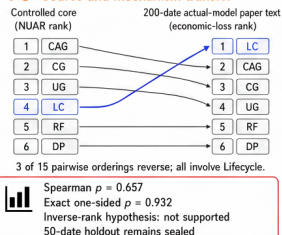

Takeaway: Low NUAR alone does not identify a universal winner.

F2 Provenance under partial observability

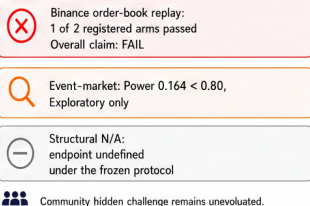

Takeaway: Clean current roles do not guarantee clean authority.

F3 Source and mechanism transfer

Takeaway: The attractive pilot inversion did not reproduce.

F4 Evidence gates preserve adverse results

Takeaway: Fail, exploratory, and structural N/A are retained—not converted into wins.
